Remarks to role and function:

The professors contribute as professional specialists for Urban Architecture and Planning, giving lectures and seminars, are responsibly involved in the ALFA-AURORA research & training projects and moreover act as tutors.

Moreover, Camilo Michalka (UFRJ), Jorge Pena Diaz (CUJAE) and Pablo Allard (PUCC) are the organisers of the three workshops in Rio de Janeiro (year I), Santiago de Chile (year II) and La Habana (year III)

The grant-holders contribute to the research projects and are involved in the presentations and professional discussions of the workshop
